02
Charcoal IL Rock Panel, Perth WA, Australia.

03
White IL Rock Panels wall, Dubai.

Norstone® has been developing its leading edge Rock Panels for over 15 years and the classic look of stacked stone is best achieved with our high quality natural stone panels.

The IL Rock Panels are made of 10-12 pieces of stacked stone assembled into interlocking panels with stepped ends. These are simply the highest end stone panel as they hide the panel look. What could be better than looking at a stacked stone wall made of panels that you cannot find.

“Norstone® has helped us at every turn and has gone above and beyond what was expected. This is an excellent company to work with.”

Charles Wallace
Judge Executive, Carter County, KY
