Where a bigger bolder look is desired, Norstone's new XL Rock Panels delivers. With just 5-7 large cut strips (pieces?) of stone per interlocking stepped end panel, XL's expansive composition gives a feeling of grander scale, making a great choice for broad feature walls.

With fewer stone strips per panel Norstone's new expansive rock panel, the XL series is the perfect composition giving the feel of a grander scale.

“I searched for months for a stacked stone veneer and Norstone’s products are superior to anything on the market. I highly recommend Norstone® if you are looking for a natural stone that will be unique to your home or business.”

Michael Maltby
